ISI WEB OF SCIENCE: NOT JUST GOOD NEWS FOR SCIENTISTS

The Flinders Library is delighted to announce the recent addition to its extensive list of electronic resources of the prestigious Web of Science database. On the recommendation of University librarians the Australian Vice-Chancellor’s Committee arranged a consortium purchase with ISI to ensure the resources of this huge multidisciplinary database are available to smaller universities as well as those who can afford the high subscription rates. Twenty eight universities have joined the consortium arrangement which runs from 2002-2004.

The Web of Science provides seamless access to the Science Citation Index Expanded, Social Sciences Citation Index, Arts & Humanities Citation Index and Current Contents Connect. It enables users to search current and retrospective multidisciplinary information from nearly 8,500 of the most prestigious, high impact research journals in the world. ISI Web of Science also provides a unique search method, cited reference searching. Cited reference searching enables the searcher to navigate forward, backward, and through the literature, searching all disciplines and time spans to uncover all the information relevant to their research.

The major features of Web of Science include:
- The ability to navigate backward in time using cited references to uncover the research that influenced an author’s work
- Navigate forward in time using Times Cited to discover a paper’s impact on current research
- Use the Related Records function to locate and display relevant items which share one or more cited references
- Expand a search using key words drawn from an article’s cited references
- Conduct cited reference searches on primary and secondary authors for articles within the ISI citation indexes
- Search the current week’s update, the latest two weeks, four weeks, individual years, or a range of years (back to 1997)
- Use reprint and research addresses to locate institutions producing specific research
- Link to the full text of primary literature and additional high quality, in-depth resources, links are based on mutual subscriptions to additional content
- The ability to export records directly to the leading bibliographic management programs, EndNote, Reference Manager, and ProCite.

See Figure 1 on page 4 for major features.

Continued page 4
From the University Librarian

ELECTRONIC JOURNAL PACKAGES

Flinders University is one of twenty eight Australian universities participating in the national site licence consortium purchase of Web of Science brokered by the Australian Vice-Chancellor's Committee. The consortium arrangement ensured that a wide range of universities were able to access this valuable research resource at an affordable price. Flinders certainly would not have been able to acquire Web of Science at the market price for an individual institution.

The Web of Science is actually a 'package' of four titles: Current Contents, Arts and Humanities Citation Index, Science Citation Index, and Social Sciences Citation Index. This reflects the current trend for publishers and suppliers to present 'packages' of electronic journals for purchase rather than individual titles. Other examples of electronic journal packages taken by the library are:

- **ASAP** with 1,439 titles which are relevant to all Flinders Faculties.
- **Blackwell Synergy** with 235 titles of particular relevance to the Faculties of Health Sciences, Science and Engineering and Social Sciences.
- **IDEAL** with 189 titles relevant to the Faculties of Health Sciences, Science and Engineering and Social Sciences.
- **Ovid** with 126 titles primarily relevant to the Faculty of Health Sciences.

- **Project Muse** with 55 titles of relevance to the Faculty of Social Sciences and the EHHL Faculty.
- **Proquest** with 3,672 titles relevant to all Flinders Faculties.

A major advantage of purchasing packages is that the total price of the package is often far less than the price of individual components of the package.

Packages are also very suitable for consortia purchasing which lowers the cost for participants even further. Another advantage of packages is that they often include a large number of titles not currently held by the library and thus greatly increase the scope of the journals which can be made available to the Flinders academic community. Packages are often linked with multi-year contracts and this can also be an advantage as it facilitates budget planning with the costs known several years in advance (except for the impact of negative currency movements).

However there are some disadvantages with packages. Firstly, a multi-year contract locks in a financial commitment over a number of years. Cancellation of the package is not an option during the term of the contract. Secondly, most packages do not allow the cancellation of individual titles within the package. The flexibility of dealing with individual titles is lost. It should also be noted that consortia arrangements for the purchase of packages often result in a limited time for consultation with academic staff as responses to package proposals are usually required very quickly.

The library will continue to assess the suitability of electronic journal packages for purchase in consultation with relevant academic staff.

Bill Cattons
University Librarian

---

ELECTRONIC REFERENCE DESK
- yes we have one

The Electronic Reference Desk is a service for Flinders staff and students who wish to send queries via email. It is intended for brief reference questions and is monitored by our helpful Information Desk Staff. You can usually expect a response within 24 hours, Monday to Friday (excluding holidays).

You may find answers to your questions on the frequently asked question (FAQ) page but for in-depth research questions you are advised to come to the Library for reference assistance or contact your Liaison Librarian.

BLOOMSDAY CELEBRATIONS IN THE LIBRARY

The Library celebrated Bloomsday again this year with help from friends from the university community seen here reading, reciting, singing and playing with great gusto.

Above right: Humphrey Tranter sings and plays.

Above: Gillian Dooley sings, accompanied by Lynda Clarke on the piano. Above right: Vincent Megaw reads . . .

Above: Robert Phidias reads . . . and above right everyone sings.
ISI WEB OF SCIENCE

Major features continued.

• Combine Searches—allows even casual users to create set combinations from the Search History, such as combining a cited reference search with a general search
• Advanced Search—enables experienced searchers to conduct a command line search using two-character field tags with Boolean operators for more targeted results

• Cited reference searching provides exclusive capabilities that cannot be duplicated using any other single resource

Web of Science users can:
• Conduct multidisciplinary searches across more than 230 disciplines

Figure 1.
The Web of Science deal also gives access to the ISI Current Contents Connect, which is the Web version of Current Contents. It offers multidisciplinary coverage plus the flexibility and functionality of the Web. Updated daily, it provides unparalleled access to complete tables of contents, abstracts, and bibliographic information from journals, books, and conference proceedings. It also enables users to access relevant, evaluated Web sites and link to full-text journal articles, full-text Web documents, and additional Web resources.

The major features of Current Contents Connect include:

- A rigorous journal selection process that emphasizes quality over all-inclusiveness, capturing the most influential international journals
- Cover-to-cover indexing that provides access to all the valuable information available in journals, not just the articles
- Tables-of-contents browsing, with links to the full bibliographic record
- Rapid and expert indexing that assures current and accurate information

- Seven multidisciplinary editions and two focused collections, each enabling users to conduct cross-disciplinary searches to find a wide range of relevant data

Flexible search options:

- Select the time period to search: since last visit; the current week; the last six weeks, the last six months, or the extended file to 1997
- Browse tables of contents by Current Contents edition, discipline, or journal title
- Browse qualified Web sites via Current Web Contents by Current Contents edition and discipline
- Receive search results via optional weekly e-mail alerts

Continued page 16

ISI WEB OF SCIENCE

- Discover who's citing their research and the impact their work is having on the global research community
- Uncover the seminal research of an important theory or concept
- Measure the influence of colleagues' or competitors' work
- Follow the path and direction of today's hottest ideas and concepts
- Determine if a theory has been confirmed, changed, or improved
- Find out how a basic concept is being applied
- Track a topic through years of research literature
- Verify the accuracy of references
- Locate relevant articles missed through a topic or subject search

Web of Science can be accessed at:
http://www.lib.flinders.edu.au/resources/databases
For more information please contact your Liaison Librarian.
IS WEB OF SCIENCE USEFUL FOR YOU?

Biology
Tracking how researchers build progressively on the research of others
A PhD student studying an aspect of marine ecology found Web of Science useful to build a detailed picture of related research by following the two different sets of links available from any article - Cited References and Times Cited. By following these links it is possible to build up a picture of relevant and related research.

For example this particular search result was achieved by following links to Cited References from a group of initial articles to locate a group of secondary articles. The trail continued by following Cited Reference links from the second group of articles to locate further articles. As well as following links to cited references they also followed Times Cited links to later articles that cited articles that had already been located and found to be of interest. A useful printout was generated that formed the basis of a literature review.

Social Sciences
Deciding on a thesis topic
A research student looking at "corporate governance" as her thesis topic was advised to use Social Science Citation Index to retrieve bibliographic information from article titles, keywords, or abstracts. Her search returned 500+ records dating back to 1997. She was able to scan the summary lists relatively quickly, clicking on individual records to read the abstract or check for cited references and related records. Social Science Citation Index served as a valuable research tool in helping her decide the nature of her thesis topic.

Education
Multidisciplinary Information is an advantage to researchers
For researchers and research students in the School of Education, Web of Science offers a number of useful features. For example, to see who has cited Biggs' 1993 research on study process inventories, published in the British Journal of Educational Psychology, it is simply a matter of running a "cited reference search". The results also show the other citations for each reference. To find references without an exact citation to follow, choose a "generic search". This would be useful to see what Sternberg has written on creativity, for example. Once again, the results will also show other citations for each reference.

Because both authors have published in such a range of journals, it can be more efficient to search the multidisciplinary Web of Science rather than several different subject specific databases, especially to locate their more recent research.

Nursing
Web of Science for Nursing Researchers
The multidisciplinary nature of much nursing research makes Web of Science the ideal bibliographic resource for the nurse researcher. For example, a diabetes nurse educator with an interest in diabetes education could select both Social Science Citation Index and Science Citation Index for searching, enter "diabetes education" and quickly locate highly relevant references to articles published in the most influential and high impact journals across the fields of nursing, medicine, education, nutrition, psychology and sociology.

Then, once the researcher has identified an article of interest, Web of Science's high degree of interconnectivity makes finding similar articles simple. By clicking on the "Find Related Records" button, the database then looks for any articles with references in common with the article of interest. Furthermore, these are presented to the researcher, ranked in order of relevancy.

For any article located, researchers can see at a glance the number of times the article has been cited elsewhere and can access the article's own list of references.

A link to Journal Citation Reports is also available at this point. This allows the researcher to know the relative importance, or impact factor, of the journal title containing that piece of research.

Law
Multidisciplinary content useful
Web of Science isn't as good for strictly legal topics because a lot of mainstream important legal publications are not covered. However, there is quite good coverage of cross-disciplinary materials, law and medicine, law and politics etc. For example:

1. General search.
   Topic= DAMAGES AND [BREACH OF CONTRACT]
   retrieves five quite respectable items.

2. Cited reference search
   Cited author=LUBAN D*; Cited Work=J LEGAL EDUC; Cited year=1999
   retrieves 3 useful items.
FLINDERS LAW LIBRARY JOINS WEBLAW

Weblaw is an electronic subject gateway of Internet resources for Australian legal researchers. It is a cooperative project being developed by Australian law librarians to develop up-to-date, high quality subject guides. Resources will be indexed using commonly agreed metadata based on international standards.

The project will eliminate the time and effort required to create different subject directories for contributing institutions. Law librarians take responsibilities for particular subject areas and an academic or practitioner in the subject is asked to review the listing. Currently around 15 institutions are members of WebLaw. These are university law libraries, National Library of Australia, Parliamentary Library, and legal research institutes and foundations. The WebLaw project is coordinated by University of Queensland Library.

Flinders University Law Library has recently contracted to become a contributor to Weblaw with the subject of its page being Policing and Law Enforcement. Professor Andrew Goldsmith of the School of Law has generously agreed to review the page on a continuing basis.

The Flinders page may be seen at:

There is a link to the Weblaw homepage on the Flinders site or from:
http://lawfoundation.net.au/links/weblaw.html

The Fridays at the Library series is presented by Flinders University Library with the assistance of

Unibooks
VOYAGER INFORMATION SYSTEM – NEW FEATURES!

- Reciprocal borrowing arrangements – no need to register
Following the implementation of the Voyager Information System improvements have been made to the reciprocal borrowing arrangement between the three South Australian university libraries. From now on users will no longer have to register to use the service. Rather, eligible staff and students need only present their current Flinders University ID card at either a University of Adelaide or University of South Australia library. At the time that the card is presented borrower details will be transferred to the library from which the loan is being made.

Users of this service may borrow up to ten books at a time from either library. Borrowers are responsible for complying with all rules of the library from which they are borrowing. This includes any charges for lost books. Suspensions for overdue books and the like at any South Australian University library will block borrowing from all.

Should you need further information please contact the Circulation Supervisor in any branch library.

- Course Reserve search
Staff and students can now search for reserve items through the new Course Reserve Search facility available on the main search screen. A Course Reserve search will allow users to search for items on reserve via a particular topic code, department or lecturer. To search, simply select from the drop-down menu in the instructor, department or course fields to retrieve all the items on reserve for your search choice. The retrieved list will include both print and electronic items on reserve.

- Joint Library Store requests
A new facility to allow staff and students to request items that are located in the Joint Library Store has been introduced. Items located in the store can now be requested through the Requests button in the library catalogue in much the same way as you would place a hold request. Simply search the catalogue to find the item you want, click the Requests button and enter your library barcode and name. Choose ILS Request from the pull-down menu and click Select. The ILS Request form will display with the title details of the item you selected. Complete the form by either clicking Select an item for a book) or Specify an issue (for a periodical). Choose your preferred pickup location from the drop-down list. You will be notified when the item is available for pickup.

- Online book requesting
Academic staff who would like to recommend the purchase of a book for the Library’s collections, can now login to the Voyager Information System and choose Requests and then Purchase Request from the menu.

- Exact Call Number search
A new call number search index has been introduced for those patrons who wish to search by an exact call number. This index should be used only when you wish to retrieve a specific item and have the complete and exact call number details. Generally, if you enter a call number (e.g. 363.5 G793s) the system will display one record only as you have searched for a known specific item.

You can also search for electronic reserve items in this way. For example, enter eReserve AGES 8001 and you will retrieve a list of all items that have a call number of eReserve AGES 8001. The list you retrieve will contain the author, title and call number and can be sorted further by date, author or title.

Voyager can be accessed from: http://voyager.flinders.edu.au/
For further information please contact the Information Desk in any of the Libraries.
Electronic Resources

New Resources
HighWire Press Archive
The HighWire Press Archive initiative was designed to provide online access to the back issues of printed journals in the sciences and medicine. Over 150 titles are currently available online, generally 12 months after publication of the printed edition. Many are new journals to Flinders Library.

The HighWire Press Archive site also provides online full text access to other journals that are online access for a trial period. Journals included cover topics such as biochemistry, cell and molecular biology, microbiology and virology, Immunology and Immunology, neuroscience and neurobiology, physiology, plant sciences, cardiovascular medicine, clinical medicine, psychiatry and psychology.

The expected audience for Highwire is generally undergraduate science students as searching is only by keyword, not allowing complex searching even though Medline is part of the database. However it does provide a useful cross discipline searching capability and of course browsing of favourite journals.

Connect to HighWire Press
http://init.highwire.org/lists/freeart.dll

For further information please contact either:
Science Liaison Librarian, Tom Snook, email Tom.Snook@flinders.edu.au
Medical Liaison Librarian, Jess Tyndall, email Jessica.Tyndall@flinders.edu.au

Current Subscriptions News
Ingenta
Ingenta provides researchers with access to a comprehensive collection of academic and professional content online, all available in full-text. Over 140 titles are currently available, covering the Social Sciences and Humanities disciplines.
Ingenta is available on campus at http://www.lib.flinders.edu.au/resources/ej/ingenta/

For further information please contact your Liaison Librarian.

Lexis.com
Lexis.com is a legal database, containing over 4000 full-text sources.

The database is now easier than ever to use, and features the following enhancements:
- Lexis Search Advisor locates legal materials that help you target a legal issue, identify an appropriate source, and formulate your search request.
- Case Summaries provide you with easy-to-read caselaw summaries — written by Proquest's expert staff of attorney editors and including a Procedural Posture, Overview, and Outcome — so you can quickly assess the facts and main points of law in a case.
- LexisNexis Core Concepts or headnotes link directly to Search Advisor to review relevant cases, analytical materials, or legal news.
- LexisNexis Gel & Print is the fast and easy way to retrieve and deliver multiple full-text documents in a single search from a single screen — directly to your printer or browser.
- Enhanced Navigational Tools guide you through exclusive LexisNexis content, including Matthew Bender® treatises, CCH® materials, and more. You'll find the information you need quickly and easily through an expandable Table of Contents and links to subheads, footnotes, and sections within documents.

Access to Lexis.com is available at:

For further information please contact the Law Librarian, Helen Cultshaw, email Helen.Cultshaw.

Proquest — has expanded.
Covering over 3400 full-text journals and comprising sixteen smaller databases, ProQuest 5000 International is one of the world’s most comprehensive collections of digital information. Millions of complete articles are available online.

ProQuest 5000 International puts a large amount of information at researchers' fingertips. It provides articles from many of the best digital databases, including ABI/INFORM Global, Pharmaceutical News Index, ProQuest Accounting & Tax Database, Proquest Asian Business, ProQuest Banking Information Source, ProQuest Career & Technical Education, ProQuest Computing, ProQuest Education Complete, ProQuest European Business, ProQuest Newsstand, ProQuest Religion, ProQuest Telecommunications, and Academic Research Library.

These are some of the most popular information resources in academic, government, and public research environments worldwide.
Electronic Resources

Proquest is available on and off campus at http://www.lib.flinders.edu.au/resources/el/psrq/
For further information please contact your Liaison Librarian.

Psychinfo and APA
Full-text links to APA (Psycarticles) journals are now available from within the Psychinfo database. An example appears below. To view an article, the user just clicks on the link in the “FTXT” field.

Record 2 of 43 in PsychINFO 2000
AN: 2001-16330-007

CALL No.: 150.5 A52

Psychinfo can be accessed from:
For further information please contact the Psychology Liaison Librarian Tony Giorgio: email Tony.Giorgio.

Ideal – don’t overlook one of our high quality fulltext databases
IDEAL® (International Digital Electronic Access Library) is an online electronic library containing Academic Press journals. Abstracts and tables of contents are presented in HTML and full-text articles are delivered in Adobe Acrobat® format.
Coverage is predominantly science/technology and is of greatest interest to researchers. It includes issues of journals published since 1996, with a limited number of 1995 issues also available.
Major subject categories:
Biomedical Sciences
Business and Law
Computer Science
Economics and Finance
Engineering and Material Sciences
Life Sciences
Mathematics and Computer Science
Physical and Environmental Sciences
Psychology
Social Sciences
Ideal can be accessed at:
http://www.lib.flinders.edu.au/resources/el/
academicpress/
For further information please contact your Liaison Librarian.

DECLARING INDEPENDENCE: A GUIDE TO CREATING COMMUNITY-CONTROLLED SCIENCE JOURNALS

The Scholarly Publishing and Academic Resources Coalition (SPARC) and the Triangle Research Libraries Network (TRLN) launched Declaring Independence: A Guide to Creating Community-Controlled Science Journals. Declaring independence is a website (http://www.ari.org/sparc/DI) and a print handbook that helps editors and editorial boards of high-priced journals evaluate their journal’s service to the community. It also offers editors a framework for considering their publishing objectives and options. Declaring independence provides a checklist for evaluating editors’ current journal and potential alternatives, with advice on key contract provisions, marketing and sales, production and distribution and innovative business models. SPARC members have been asking for a resource like Declaring Independence and this answers a tremendous need in the research community.

SPARC is a worldwide alliance of research institutions, libraries and organizations that encourages competition in the scholarly communications market. SPARC introduces new solutions to scientific journal publishing, facilitates the use of technology to expand access, and partners with publishers that bring top-quality, low-cost research to a greater audience.
E-RESERVE — Amanda Nixon

The Victorian Association for Library Automation Inc (VALA) Conference

Amanda Nixon, at the time the Law Liaison Librarian, attended the VALA conference in Melbourne earlier this year where she delivered a paper on the Flinders University Library development of an electronic reserve collection - E-Reserve. Below is an account of her paper and some observations on Monash University’s E-Reserve.

The idea and technology for e-reserve has been around for a long time, but copyright laws meant that libraries could not begin without some restrictions. Copyright provisions as they were prior to 2000 required that each copyright owner was contacted and permission granted for an electronic copy before anything could be added to e-reserve. Quite sensibly, I think, Flinders put aside ideas of e-reserve until the copyright regime changed. Monash, however, went ahead and got permission from authors where they could, and as a result, built up an electronic reserve a few years ago. The copyright situation changed for Flinders in 2000 with the signing of a new CAL agreement enabling electronic copies of materials to be made. An e-reserve committee was set up, a trial was started and the rest is history.

I can remember listening to Andrew Harrison’s paper at VALA, “The Digitisation Centre: Monash University Library’s digitisation service, integration of e-reserve and access to digitised images” and being quite amazed at the differences between the libraries. When it came to the “hands on” side of things, it appeared that Monash was further down the track and much better resourced.

<table>
<thead>
<tr>
<th>Finders</th>
<th>Monash</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scanning duties performed by existing staff on top of other duties – or arranged by academic staff</td>
<td>Digitisation Centre staffed by full time project officer, 2 full time equivalent assistants and 1 half time casual assistant</td>
</tr>
<tr>
<td>Various scanners used from other areas</td>
<td>3 dedicated scanners</td>
</tr>
<tr>
<td>Scan direct from books/journal</td>
<td>Photocopy then scan</td>
</tr>
</tbody>
</table>

But despite this, we have an e-reserve:

- With intellectual integrity – meaning academics decide what’s on e-reserve, not copyright holders
- That’s generated much interest from staff and students
- That was started before we had a web-based library management system (a fact in itself)

OUT OF SITE: NOT A PROBLEM. SUPPORTING MEDICAL STUDENTS IN A RURAL LEARNING COMMUNITY

— Jessica Tyndall

Lifelong Learning Conference, 2002 Central Queensland University.

In deepest Adelaide winter, Jessica Tyndall, the Medical Liaison Librarian, gave a paper in sunny Cairns on supporting distance students. Someone had to go.

The paper discussed the library’s role in supporting rural medical students based in the Riverland. It looked at the development of medical students into lifelong learners and the part played by the liaison librarian, in collaboration with School of Medicine, in this overall process.

The librarian works with these future practitioners to help them develop information retrieval skills so that they learn how to search effectively for the quality resources needed to practice evidence-based medicine. The School of Medicine then takes this further by developing the students’ skills in critical appraisal. The paper looked briefly at problem-based learning, lifelong learning, rural retention of doctors and learning communities. New rural practitioners need no longer be professionally isolated as self-directed learning skills enable them to become informed members of a virtual learning community where physical distance is immaterial.

Out of site, not out of touch.

The presentation is on the web:

http://elms.cqul.edu.au/conference/

In Brief

Reference Librarian appointed to Law Library
The appointment has been announced of Kate Sinclair as Law Reference Librarian. Kate brings with her a wealth of experience from Adelaide University Law Library where she worked for four years. Most recently Kate has been employed by CPA Australia where she undertook the dual roles of librarian and training officer. In the Law Library Kate will assist with information services, training programmes and liaison services.

DONATION: from the Director General for Book Collections and Cultural Institutes in Rome
The Library has recently received a generous donation of books from the Director General for Book Collections and Cultural Institutes in Rome through their Office of International Exchanges. The donation was arranged through the Flinders University Italian Department. Titles predominantly cover the subject areas of Italian literature, poetry, drama and history from the twelfth century. They will be a valuable addition to library resources for students of Italian at Flinders.

See page 18 for the titles and call numbers for the books.
NEW LITERATURE RESOURCES

Two recent donations of material have added to the Special Collections strengths in the field of literature.

The Richard Conyers Collection
Richard Conyers was a promising young Ph.D. student in the English Department when he died in September 1998.

Richard, whose Honours thesis was on the esoteric American writer William Goddiss, was ever one to pursue the recherché and difficult in his studies, and his Ph.D. research in progress was a comparative study of modernist poet Ezra Pound and William Langland, the medieval author of Piers Plowman.

Richard had during his short life built up a small but remarkable library, and Ron and Jackie Conyers, Richard's parents, have now donated a part of his book collection related to his research to the Library to be kept as a special collection in his memory. All books are catalogued in Voyager.

Information about the collection can be found at:

The Ian Reid Collection
In 1978, Ian Reid, then a recent Ph.D. graduate from Adelaide University, donated to Flinders Library a small collection of manuscript letters from more than twenty Australian authors whom he had studied for his doctorate. The writers include Frank Dalby Davidson, Christina Stead, Kylie Tennant and Xavier Herbert.

Twenty-four years later, Professor Reid has now retired from his position at Curtin University, and has generously given us a considerable amount of material to add to this small collection. The new donation includes manuscripts relating to American and Australian authors, including poets Kris Hemensley, Robert Duncan, and Denise Levertov and novelists Elizabeth Jolley and Frank Moorhouse, as well as approximately 900 books on Australian, New Zealand and American literature.

Information about the manuscripts is to be found at the web address below. The books will be catalogued in Voyager in the near future.

Professor Reid was Deputy Vice-Chancellor of Curtin University of Technology 1991-2001, and the Director of the Centre for Literacy, Culture & Language Pedagogy 1993-96. Previously he taught English literature at Deakin University, Adelaide University and Massey University, NZ. He has published many books and articles, including 3 books of poetry, and has edited leading Australian literary magazines. He was a co-founder of Friendly Street Poets (Adelaide).

Other Literature resources
The Ingamells Collection is a collection of Australian literary manuscripts donated by the widow of Rex Ingamells in 1973. It includes manuscripts of his works and letters to and from other Australian writers. For details see the web site at:

Australian Literature
In addition, Special Collections holds an extensive range of early Australian literature, much of which has been purchased from the Jim Main Bequest. All these books are catalogued in Voyager.
EXHIBITIONS NOW TOURING TO THE BRANCH LIBRARIES

Visitors to Sturt and Medical Libraries might have noticed that some display cases have appeared recently in the Branches, with selections from some of the exhibitions which have been showing in the Central Library.

Exhibition themes so far have included Life on Board Investigator and New Acquisitions in Special Collections. Currently at Medical, and coming soon to Sturt, is the Jacobite Collection, a fascinating look at a selection of 17th and 18th century books and pamphlets held in Special Collections. Plans for touring displays for the rest of the year include the Allan Bray Science Fiction Collection and the Children’s Literature Collection. The displays will be changed every six to eight weeks during semesters.

There are three display cases in the Medical Library, near the entrance, and two in the Sturt Library, near the newspaper reading area.

Please contact Gillian Dooley, Special Collections Librarian, on 8201 5238, email Gillian.Dooley, if you would like any further information.

Focus

PSYCHOLOGY

Psychology Liaison Librarian - Tony Giorgio
In Semester One Tony attends introductory lectures to introduce himself and explain his role as the Psychology Liaison Librarian. Throughout the year he is available to take tours of the Library and to run Information Literacy sessions where he can demonstrate electronic resources and other types of research materials. He is happy to accommodate large classes of students as well as smaller groups of academics and higher degree students. Individuals, particularly those who require “refresher” sessions on using library resources, are also welcome. Tony can be contacted at tony.giorgio@flinders.edu.au or telephone ext 13542.

Databases and Full Text Electronic Resources can be accessed from the Library’s Homepage www.lib.flinders.edu.au (look under heading “Information Resources”).

Main databases include:

PsycARTICLES - an online database containing more than 27,500 searchable full-text articles from 49 peer reviewed journals published by the American Psychological Association and allied organizations from 1988 to the present, with earlier years in production. The PsycARTICLES database covers general psychology and specialized basic, applied, clinical, and theoretical research in psychology.

PsycINFO - a citations with abstracts database of psychological literature from 1887 to the present. PsycINFO is a great research tool because you can search over a million records and just pull out what you need. The main PsycINFO database contains almost 2 million references to psychological literature, from journal articles, books, book chapters, technical reports, and dissertations. You can now link to the full text in PsycARTICLES from a PsycINFO record.

Journals@Ovid - one of the world’s largest fulltext databases covering over 530 scientific, technical and medical journals with issues as far back as 1993, from more than 60 different publishers.

Medline - from the National Library of Medicine provides bibliographic and abstract coverage of biomedical literature with over 11 million citations back to the mid-1960’s.

Sociological Abstracts - gives access to the latest worldwide findings in theoretical and applied sociology, social science, and policy science. Sociological Abstracts features journal citations and abstracts; book, chapter, and association paper abstracts; and book, film, and software review citations.
Focus

ERIC – from the Educational Resource Information Center is of particular interest to educational psychologists, covers all aspects of education with more than 1 million abstracts of documents and journal articles on education research and practice.

AgeLine – provides bibliographic references and abstracts for materials related to aging and middle age, from an interdisciplinary perspective of psychology, economics, sociology, gerontology, public policy, business, health and health care services, and consumer issues.

Biological Abstracts – the basic research tool for those involved in the biological and biomedical fields. It includes citations with abstracts from approximately 9,000 international journals, books, patents, conference proceedings and symposia in the biological and biomedical fields. Also includes original research reports and reviews.

APAS – the Australian Public Affairs Information Service, produced by the National Library of Australia, is a bibliographic database that indexes articles from a wide range of periodicals, newspapers, scholarly journals, conference papers and books in the social sciences and humanities. Emphasis is given to current articles on Australian political, economic, legal, social and cultural affairs.

AEI – the Australian Education Index, produced by the Australian Council for Educational Research, is a bibliographic database that indexes and abstracts articles from published and unpublished material at all levels of education and related fields.

Expanded Academic ASAP International Edition – another large database which contains more than 1,500 indexed journals from the social sciences, arts and sciences with over 520 of them available in full text. Coverage begins in 1980 to the present and updates occur daily.

ProQuest – this online information service provides access to thousands of current periodicals and newspapers, many updated daily and containing full-text articles from 1986. Backfiles of archival material are also included. The social sciences are particularly well served.

Current Contents Connect – a multidisciplinary current awareness resource, providing access to complete bibliographic information (including contents pages) of over 8,000 of the world’s leading scholarly journals and more than 2,000 books.

Electric Library Australasia – contains the full-text of many Australian newspapers, including The Advertiser, The Australian and the Sunday Mail. It also contains the full text of many journals, books and transcripts as well as thousands of maps and pictures.

Psychology books – new acquisitions

All held in the Central Library unless otherwise marked.

CURRENT CONTENTS CONNECT

- Create and save sophisticated search profiles for quick, easy searching
- Create up to 25 search sets per session

Powerful links and expanded content. With the new capabilities of Current Contents Connect web links are provided to:
- Publishers full-text documents, including free or publicly available online journals as well as 4.8 million electronic full-text records via ISI links for mutual subscribers
- More than 3,600 expertly evaluated Web sites
- ISI Web of Science access to ISI citation indexes and cited reference searching
- National Center for Biotechnology Information (NCBI) GenBank

- Current Contents eSearchSM technology takes the
  Current Web Contents selection process
  further. ISI subject experts have reviewed and
  approved over 170,000 full-text Web
  documents, and have classified them according to
  resource type: preprint, funding, or research
  activity. These documents are indexed so users can
  access them via CC Connect.

ISI Current Contents Connect can be accessed from:
