With a solid academic foundation and workplace ready students, Flinders placements make good business sense.

Flinders University is committed to providing a student-centred, innovative, supportive and high quality learning experience.

For students, placements develop work-ready skills. For employers, taking part in a student placement offers benefits that go well beyond providing a foundation for tomorrow’s professionals.

Student placements can assist your heavily committed teams; allow you to assess potential employees; contribute to your community engagement goals; and foster long term research collaboration with the University.

The Flinders Business School placement program is designed to give students a real opportunity to gain experience and enable them to put theory into practice by undertaking an industry placement or project.

Our students are well prepared for placements in their 2nd or 3rd year of a Bachelor of Business or Bachelor of Commerce degree, with current knowledge of workplace compliance standards and professional codes.
